Curriculum Vitae

Senior Data Engineer · Financial & Market Data Platforms
Republic of Korea · augustino0890@gmail.com (mailto:augustino0890@gmail.com) · LinkedIn (https://www.linkedin.com/in/augustine2015/) · GitHub (https://github.com/augustine0890) · Twitter (https://twitter.com/augusti61988772)

> *Reliable data platforms for financial operations, analysis, and AI.*

Profile

Data engineer with experience across **financial data infrastructure, distributed processing, streaming pipelines, SQL migration, and enterprise AI retrieval**. Architected highly available database clusters managing **5B+ records** and optimized **Spark** processing for a platform serving **10M+ users**. Built operational monitoring and financial SQL workflows, and contributed the winning enterprise RAG solution at **FPT AI Hackathon 3 (2025)**.

Focused on **Senior Data Engineer roles in financial and market data platforms**, with an interest in growing toward Staff-level responsibility for architecture, reusable engineering standards, and alignment between data producers and consumers. Engineering priorities include **financial record consistency, source reconciliation, controlled schema evolution, and recoverable ingestion**, guided by downstream business requirements.

Awards & Recognition

Champion — FPT AI Hackathon 3 · *2025*
Global competition across all FPT offices worldwide. Team *Cẩm Y Vệ (FKR-KTX)* placed 1st in the *KT/KB Technical Solutions* track with **AISOL**, a Japanese-language enterprise RAG platform built on Qdrant, Gemini, and Qwen.

Professional Experience

FPT Software Korea — *Data Software Engineer*

June 2024 – Present · South Korea

Investment Securities Project — Meta

Migrated an Oracle database to EDB (PostgreSQL), optimizing SQL queries for performance and compatibility to meet business requirements.

- Converted and optimized Oracle SQL queries to ANSI-standard for EDB (PostgreSQL) compatibility, improving query efficiency.
- Translated complex business requirements into high-performance SQL queries, ensuring alignment with project goals.

Technologies: Oracle · EDB (PostgreSQL) · ANSI SQL

QA/QC Data Analytics and Visualization Dashboard

Data processing and reporting for quality operations.

- Built SQL and Java pipelines to aggregate, preprocess, and analyze QA/QC records.
- Used Apache Commons Math for statistical processing and delivered reports through Spring Boot REST APIs and Chart.js dashboards.

Technologies: SQL · Java · Oracle · Apache Commons Math · Chart.js · REST APIs · Spring Boot

---

SupperTree — *Software Engineer*

April 2021 – June 2024 · South Korea

BlockStream — Real-Time Blockchain Data System

- Built scalable real-time monitoring for Ethereum and Polygon transaction data using a publish-subscribe architecture.
- Engineered data pipelines with Kafka, persisted in PostgreSQL, indexed in OpenSearch/Algolia for high-performance search.
- Managed end-to-end workflow from on-chain collection to storage and indexing, including enriched metadata.

Discord Emotion Tracker

- Built a message ingestion and enrichment pipeline for Discord customer service communications.
- Integrated AWS Comprehend and HuggingFace Rust-BERT for sentiment analysis and AWS Translate for English-to-Korean translation.
- Structured MongoDB storage for messages, translations, and sentiment metrics to support downstream queries.

NFT Management — Token Staking and Earning App

- Developed scalable backend infrastructure for NFT staking and token earning, ensuring reliable UX and transaction integrity.
- Integrated blockchain technology for transparent NFT transactions; optimized database queries for high-performance data handling.

Technologies: Python · Rust · Golang · TypeScript · Node.js · Kafka · AWS Comprehend/Translate · HuggingFace · Algolia · OpenSearch · PostgreSQL · MongoDB · Kinesis

---

FitPetMall — *Data Software Engineer*

July 2020 – April 2021 · South Korea

InsightFlow — Customer Behavior Data Pipelines

- Developed data models and workflows for collecting and processing e-commerce customer behavior records.
- Built real-time event streaming and data processing with Kafka and ELK Stack.
- Delivered data workflows for shipping, product delivery, and promotional analysis.

Technologies: Python · FastAPI · ELK Stack · Apache Kafka · Oracle

---

AZEN Global — *Data Scientist / ML Engineer*

March 2019 – July 2020 · South Korea

ABACUS — Advanced Credit Risk Prediction Analysis Tool

Data infrastructure and processing for a fault-detection and credit risk platform serving more than **10 million users**.

- Architected highly-available, resilient database clusters across ClickHouse, MongoDB, and Redis to manage 5B+ records, with disaster-recovery provisions safeguarding data integrity and operational continuity.
- Optimized fault-detection data pipelines by streamlining processing on Apache Spark, materially increasing throughput for workflows serving 10M+ users.
- Built real-time monitoring dashboards and interactive reports surfacing live platform signals, strengthening operational transparency and supporting informed decision-making.
- Developed advanced credit risk models using machine learning algorithms, achieving a 3% lift in scoring accuracy and improving the precision of downstream financial assessments.

Technologies: Python · Django · FastAPI · ClickHouse · MongoDB · Oracle · Redis · Apache Spark

---

National Cancer Center — *Graduate Research Assistant (Health Data Analyst)*

September 2016 – September 2018 · Goyang, South Korea

Mendelian Randomization — Causal Analysis of BMI on Thyroid Cancer Risk

- Integrated genome-wide SNP data and environmental factors for statistical analysis using Python, R, and SAS.
- Applied instrumental variable analysis (Mendelian Randomization) to evaluate causal relationships.

Technologies: SAS · Python · R · Linux

Education

Master of Public Health — Health Data Science
National Cancer Center, Goyang, Republic of Korea · *2016 – 2018*
Thesis: *Causal Effect of BMI on Thyroid Cancer Risk using Mendelian Randomization*

Bachelor of Engineering — Biotechnology
Industrial University of Ho Chi Minh City, Vietnam · *2008 – 2013*

Credentials

- AWS Certified Data Engineer — Associate
- AWS Certified AI Practitioner — Foundational
- Microsoft Certified: Azure AI Fundamentals
- Nanodegree: Data Engineering with Microsoft Azure
- Astronomer Certification: Apache Airflow Fundamentals

Technical Skills

Domain	Tools & Methods
Financial Data Systems	Credit Risk Platforms · Investment Securities SQL · Transaction Ingestion · Operational Reporting
Batch & Streaming Pipelines	Apache Spark · Apache Kafka · Airflow · Kinesis · ETL/ELT · ELK Stack
SQL & Data Transformation	SQL Optimization · Oracle → EDB (PostgreSQL) Migration · ANSI SQL · dbt · Pandas
Storage & Reliability	PostgreSQL · Oracle · ClickHouse · MongoDB · Redis · Highly Available Clusters · Disaster Recovery
AI Data Engineering	Multimodal Document Processing · RAG · Vector Search · Qdrant · Gemini · Qwen · LangChain
Data Delivery & Observability	FastAPI · Django · Spring Boot · REST APIs · OpenSearch · Operational Dashboards
Cloud & Infrastructure	AWS · Azure · Docker · Kubernetes
Languages	Python · SQL · Rust · Golang · Java · TypeScript

Quantitative & Modeling Background

My background in **credit risk modeling, statistical analysis, and causal inference** helps me understand financial data requirements, including historical consistency, reproducible inputs, and downstream validation.

Open Source & Side Projects

- **discord-playdapp-bot** (https://github.com/augustine0890/discord-playdapp-bot) — Rust · Serenity · MongoDB · Docker
  High-performance Discord bot built in Rust using Serenity for gaming community management. Handles tournament ticket exchange, player engagement tracking, and leaderboard ranking via slash commands.
- **outfit-square** (https://github.com/augustine0890/outfit-square) — Python · Discord.py · MongoDB · Poetry
  Python-based Discord bot for user point management in metaverse gaming channels. Integrates MongoDB for persistent storage with multi-stage (dev/prod) deployment and OAuth2 authentication.

Personal Details

- Citizenship: Vietnamese
- Country of Residence: Republic of Korea
- Languages: English (fluent) · Vietnamese (native)
